In the Numeracy Intervention Room (Room 9), Newbery Park has some outstanding learning resources for parents to borrow to learn more about the Natural Maths Strategies that teachers are delivering in your children’s classrooms. Along with this there are some fantastic numeracy games that you are also welcome to borrow and play at home with your children.

If you wish to borrow these resources, please come up any time before or after school. The boxes are located in the back left corner of the room, with a borrowing book next to them. Please record the resource you have borrowed and the date. If you need any assistance, please see Mr Currie or your classroom teacher.

**Numeracy Box**

Beginning in week 5, the Numeracy Box will be back! The Numeracy Box is a problem solving activity that we encourage parents to complete with their child. Every Monday, a problem solving question will be sent home for JP students (Rooms 1, 3 & 7) and a different question for UP students. On completion, students return their activity to school and drop it into the ‘Numeracy Box’, which will be located in the front office area.

Responses will be due by Friday morning at 9am of that week, with the boxes drawn during the day and prizes awarded before the end of the day.

Along with individual prizes weekly, the class with the most nominations at the end of the year will be rewarded with a class prize.

We are looking forward to seeing you working together with your children and putting the problem solving strategies you have learnt at our Ann Baker parent sessions into action!
